

Bottom Surface 21Feb2020

Depth MLLW (ft)

- Red Daymarker
- Green Daymarker
- Tidal Benchmark
- Dredge Channel (-6.0' D)

Bathymetric survey performed by DNR on 21 February 2020. All depths are adjusted for tides to feet below mean lower low water (MLLW). Tidal benchmark is 4 horizontal nails located on piling at end of timber breakwater between jetties. This survey is representative of conditions on this date and is to be used for informational purposes only.
