

# Saving Native Bees

Learn from wildlife scientist Sam Drodge!

**Your Yard, Your Garden, Your Community Can Plant a Difference**

**Saturday, March 5 • 10 a.m. to noon  
Northeast Community Center**

**Register using Activity # 410111**

Join CCPR as we collaborate with the Town of Chesapeake Beach's Green Team for a presentation and celebration of our favorite pollinators. You probably know something about native plants and that they host many types of moths and butterflies, but did you know that they also host many types of bees? We'll talk about the many sizes and shapes of bees, what plants they use and how your plantings and gardens can make a difference.
